

Since 2000, starambiente di Marcella Bibbo specializes in making custom fireplaces in classic and modern style. Today starambiente is a leader on the front of design and technology: In addition to traditional fireplaces starambiente offer fireplaces that are distinguished by the use of alternative fuels to wood, electric or gas.

Our Bio-Technology fireplace offers the ideal alternative to conventional chimney technology and is thus cheaper and more quickly realized. The benefits of ethanol fireplaces are many. No ashes, no soot, no smoke. Our bio-fireplaces do not require approval and all built up. The Biofireplaces is portable and therefore can be connected at any time to a real chimney. Contact us and learn more about ethanol insert in a fireplace and all possibilities. An ethanol fireplace, also called bio-fireplaces, solves your problems of modern interior design

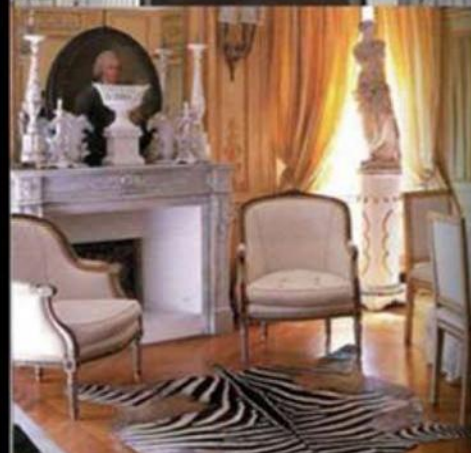

Thanks to the advice of professional architects and interior designers, unique fireplaces are made to fit any decor that does make your home unique.
